*Your life depends on it*

# SURVIVAL DRY™

## DRY!!

The Whites Survival Dry Incorporates a Shoulder to Shoulder Dry Zipper and PolyTex® Seals to ensure the User Remains Dry. DRY is the Key to Survival!

## STRETCH PANELS

Used for Rescue Teams and the Military Across Canada, These Patented Stretch Panels located Around the Waist and Knees Allows the Suit to Stretch 12"!!

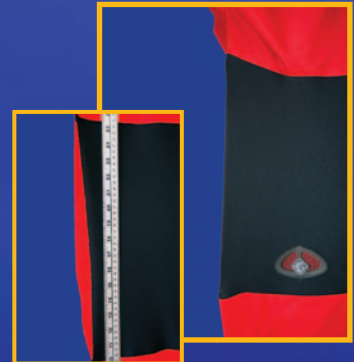

Whites Patented stretch panels combine a flexible "neoprene" panel with additional dry laminate behind this stretch panel. This panel enables the wearer to gain 6-7 inches of height in the torso; additional panels around the knees

provide up to 5 more inches of stretch. Not only do these panels ensure the suit fits the user better, but less material makes the suit easier to work in prior to an emergency.

## Not Stretched

## Fully Stretched

## DECK SUIT FOR ROUGH CONDITIONS

The incredible flex and fit of the Survival Dry is designed to be flexible enough to be used on deck in stormy conditions. Donning the neck seal and sealing the zipper takes just 10 seconds!

## WORKING SUIT

Designed For Comfort, the Whites Survival Dry has a Loose Fit Shell with an Inner Thermal Liner. The Outer Shell Combines a Stretch panel System to Provide High Mobility with Comfortable Fit.

## THE COMPETITION....

### WET!

Poor/Cheap Zipper configuration Causes the suit to Flood with Cold Water; if a "dry" Immersion suit is flooded it will speed hypothermia and create excess weight/drag inside the suit - this leaves survival to chance!

### POOR FIT!

Excess material makes traditional suits baggy, uncomfortable, and unusable for Working - all of which could result in a Flooded "dry"suit.

### RISKY!

Immersing yourself in cold water for any period of time in a suit that does not fit properly, or leaves the user at risk for getting wet could be a life altering mistake.

Whites Manufacturing is one of the largest military drysuit suppliers in North America. Founded in 1956, Whites Manufacturing is using more than 50 years of experience to create the Survival Dry. The technology used to create this suit comes from experience in dealing with the following agencies:

- Cdn. Coast Guard
  - CCG RHIOT School
  - Cdn. Army Combat Divers
  - Cdn. Fleet Diving Unit
  - Cdn. Navy Ship Divers
  - Cdn. Air Force SarTechs
- RCMP Dive Team
  - RCMP ERT Teams
  - Vancouver Police Dept.
  - US Marine Corps
  - US Navy
  - US Navy Seals
- USCG Dive Team
  - Los Angeles Police Dept.
  - Various Fire and Police Dept.'s across North America

Rest soundly knowing that your Survival suit has been constructed with the latest technology by a drysuit manufacturer with unmatched experience.

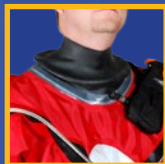

The following size chart should be used as a guideline. Due to the nature of the stretch panels, the Survival Dry has the ability to stretch a total of 12"!!

Recommended Size Chart	SMALL	UNIVERSAL	JUMBO
HEIGHT	3'11" - 5'7" / 120-170cm.	5'6"-6'5" / 170 - 195 cm.	5'9" - 7'2" / 175 - 220 cm
WEIGHT	88 - 220 lbs. / 40-100 kg.	150 - 300 lbs / 70-135 kg	250-330+lbs/110-150+kg

# SURVIVAL DRY™

**Chemical Resistant PolyTex® Seals Neck & wrist Seals** are extremely durable and fit a wide size range.

**Stow Away Neoprene Hood** When not in use, this 5 mm hood is stowed in a pocket across the back. The hood can be pulled over by grabbing Pull Tab.

**Hood Face Shield** This face shield protects the wearer from excess wind and salt spray that can be blinding and painful. It can be stowed at back of hood or donned by pulling over the head.

**Stow Away Inflatable Pillow** This Inflatable pillow is compact & stowed away across

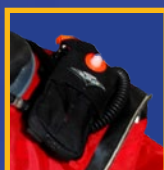

shoulders when not in use. An oral inflator is used to inflate the pillow to ensure the head stays above water.

**Stow Away Gloves** When not in use these neoprene gloves are attached to the suit and stowed in sleeve pockets - ready for emergency.

**Stow Away Buddy Line With Clip** To prevent users from drifting away, this 3' buddy line can be clipped to a buddy when in use, or stowed away when not in use.

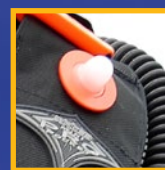

**VHF Radio Pocket** If user has a water proof VHF radio Available - a radio can be stored in this pocket.

**Dry Zipper Pull Stick** Pull Stick is used to easily open and close the dry zipper.

**Emergency Whistle** In an emergency, this water proof whistle can be blown to attract attention.

**Emergency Signal Light** A water activated battery is stored in the VHF radio Pocket the light illuminates when submerged in water.
